

Employee Leave – Leave Request Algorithm

Problem Statement

Create an algorithm for the
“Employee Leave – Leave Request”
system using the following Feature Set.

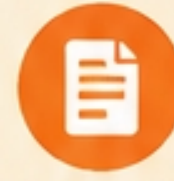

Feature Set

Employee
Details

Leave
Balance

Leave
Request

Leave
Type

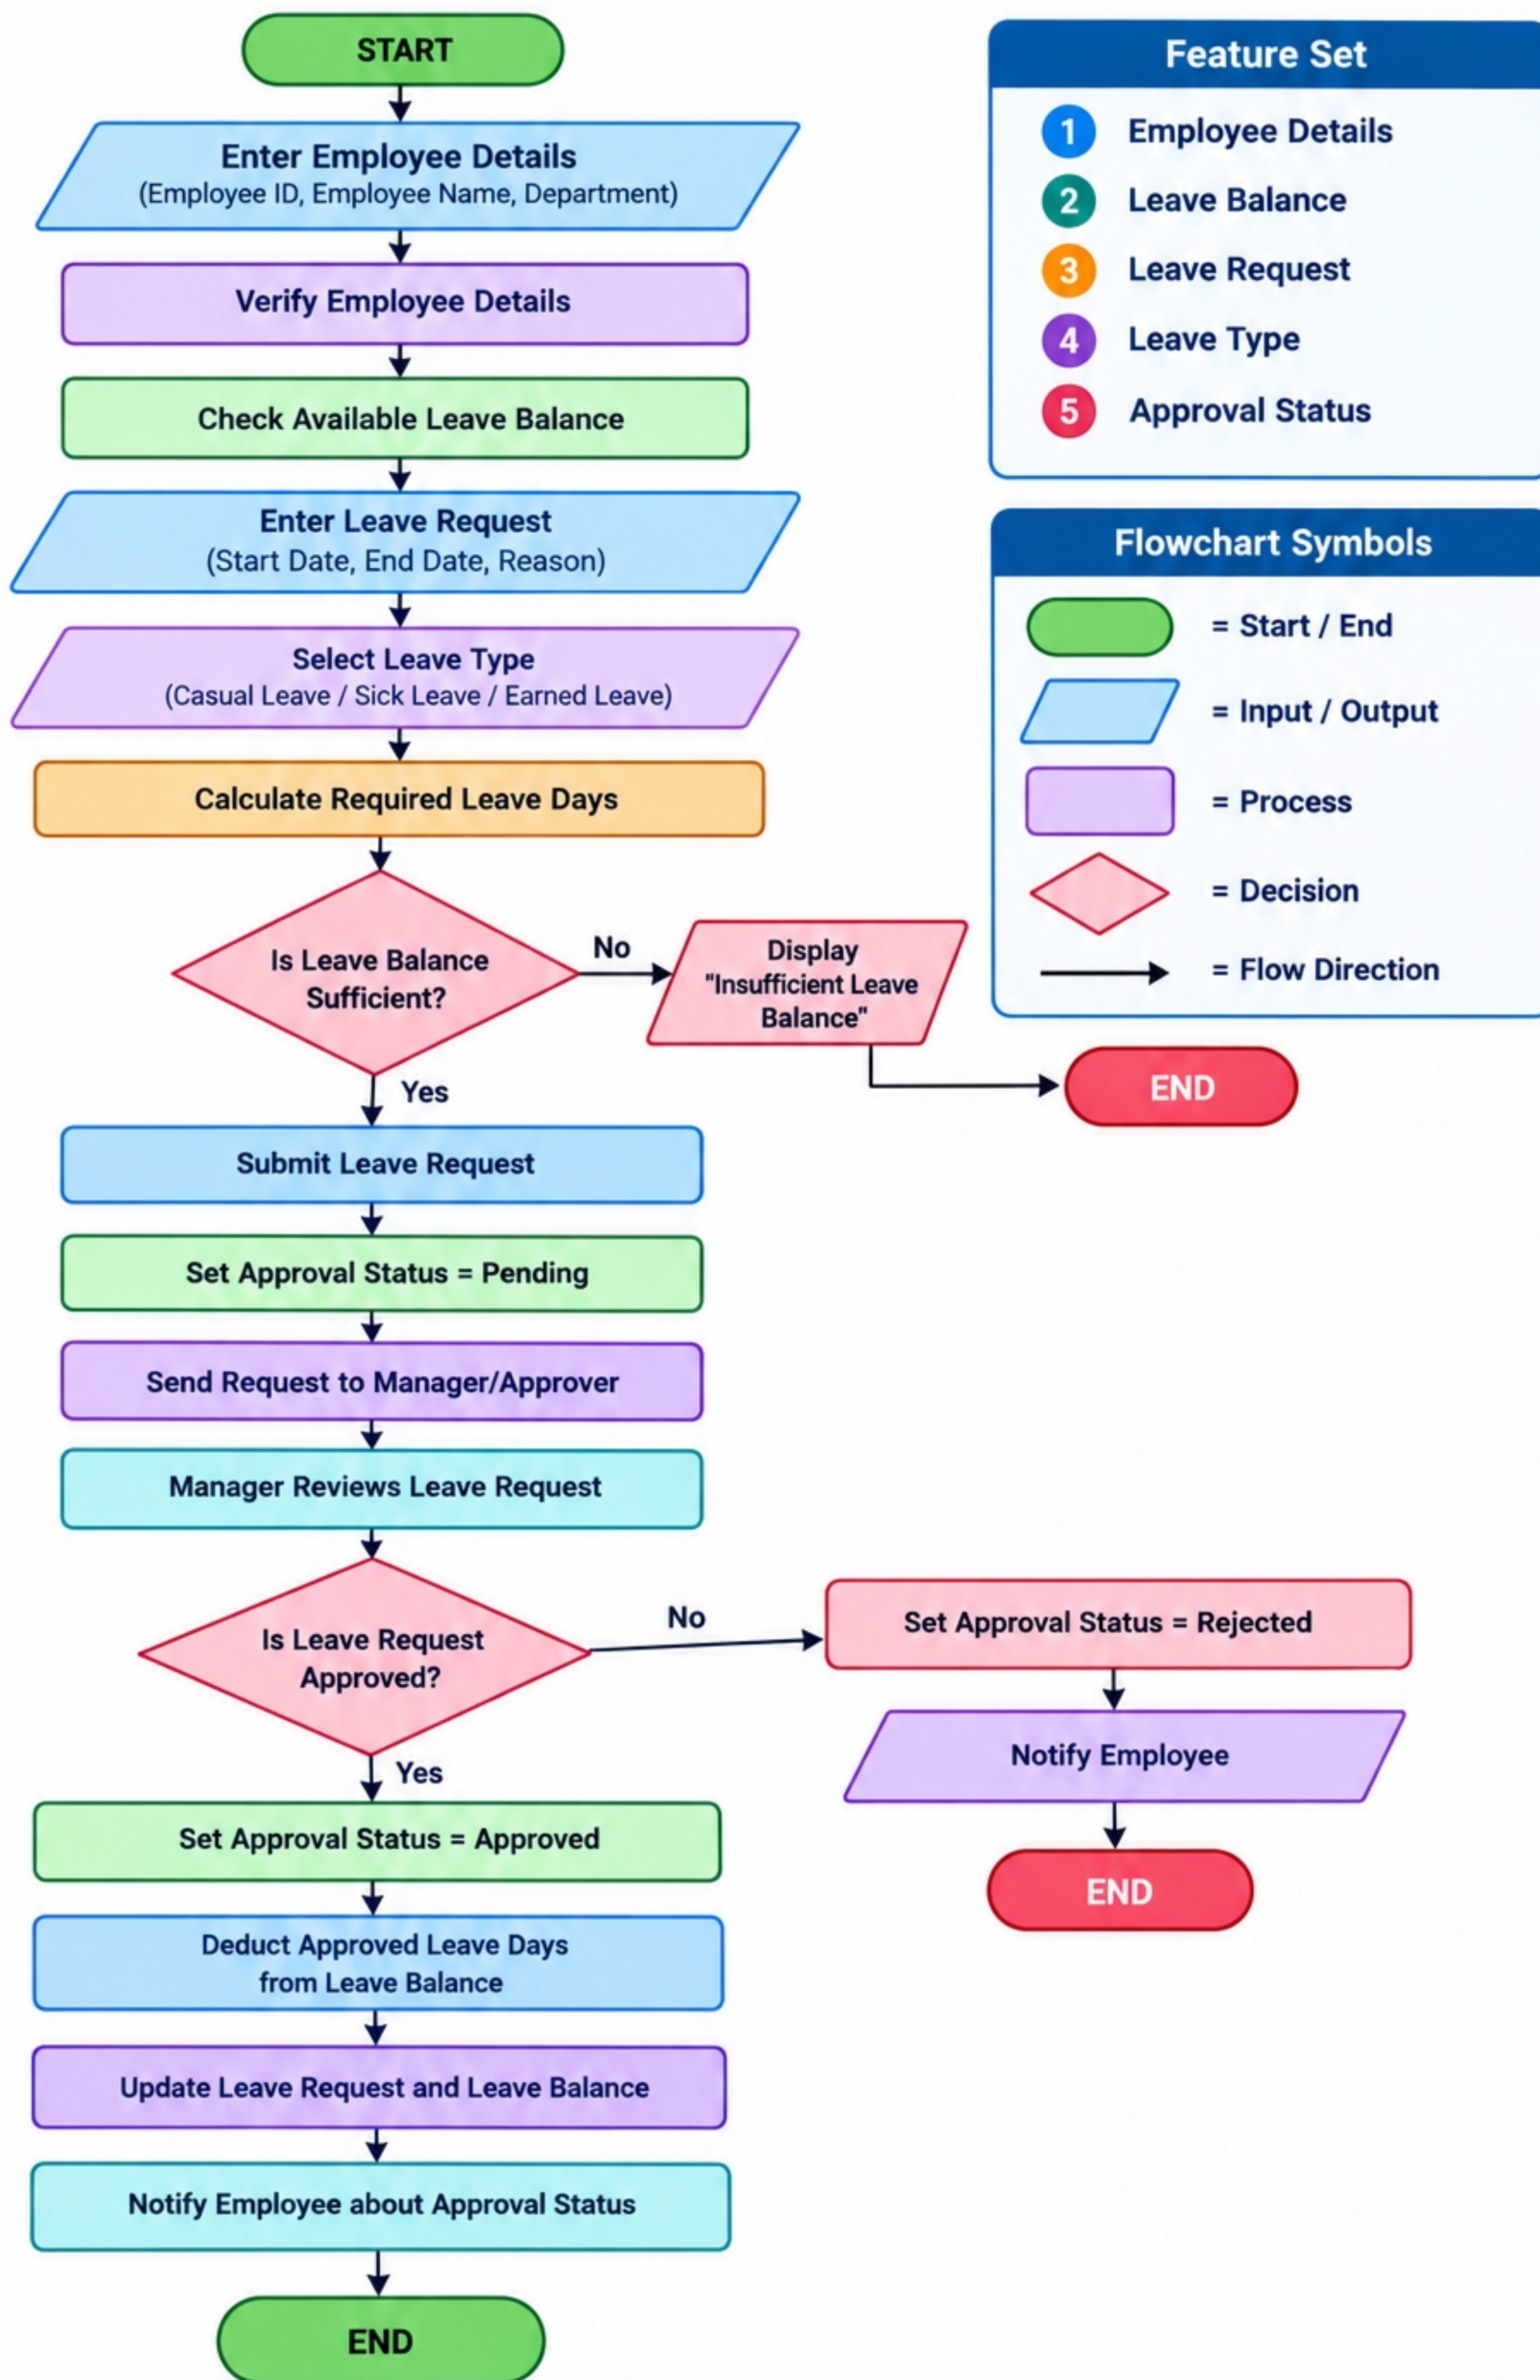

Approval
Status

Step	Algorithm
1	Start.
2	Enter Employee Details such as Employee ID, Employee Name and Department.
3	Verify the entered Employee Details .
4	Check and display the employee's available Leave Balance .
5	Enter Leave Request details such as Leave Start Date, End Date and Reason.
6	Select Leave Type such as Casual Leave, Sick Leave or Earned Leave.
7	Calculate the total number of Leave Days requested.
8	Compare the requested Leave Days with the available Leave Balance .
9	If the Leave Balance is insufficient, display “ Insufficient Leave Balance ” and go to Step 19 .
10	If the Leave Balance is sufficient, submit the Leave Request .
11	Set Approval Status = Pending .
12	Send the Leave Request to the Manager/Approver for review.
13	Manager reviews the Leave Request .
14	Check whether the Leave Request is Approved or Rejected .
15	If the request is Rejected , set Approval Status = Rejected .
16	Notify the employee that the Leave Request has been rejected.
17	If the request is Approved , set Approval Status = Approved .
18	Deduct the approved Leave Days from the employee's Leave Balance and update the Leave Request .
19	Notify the employee about the final Approval Status .
20	Stop.
